SUMMARY PROFILE

Experienced Front-End Developer with building responsive, maintainable web and mobile applications using React, React Native, JavaScript, and TypeScript. Passionate about creating intuitive user interfaces, writing clean code, and delivering high-quality solutions that provide a great user experience.

EXPERIENCE

PT. Herca Cipta Dermal Perdana Front-End Developer Jakarta Barat, Indonesia	March 2025 – Present
- Built the internal ERP Mobile app from scratch using React Native - Created a modern Next.js boilerplate for incremental legacy ERP web migration. - Built dynamic, API-driven features (filters, forms, sidebars) across web and mobile. - Created cross-platform auth to prevent user re-login between legacy and Next.js apps. - Modernized the internal HRIS by upgrading to Next.js 15 and Tailwind CSS. - Resolved complex TypeScript types and lint errors across legacy projects. - Isolated legacy HRIS code with Redux and unique ESLint configs to prevent breaking changes. - Maintained and expanded internal React/React Native UI kits on NPM (@herca/r-kit/rn-kit). - Worked with UI/UX, Backend, and QA to deliver production-ready features. - Improved performance and type safety via dependency patches, debugging, and code reviews.	
PT. Kodingkeun Digital Solution Front-End Developer Pangandaran, Indonesia	July 2022 – March 2025
- Built a public survey and feedback app targeting users within the Tasikmalaya region. - Rebuilt an e-voting system for a local SMK election using modern web tech. - Created responsive Bootstrap templates for a browser-based wedding invitation builder. - Designed and developed the landing page for umkm.page, a WordPress-based website builder. - Revamped the akunmu.id landing page with Laravel Blade & Tailwind CSS - Maintained the akunmu.id dashboard, shipping features and fixing bugs - Designed UI/UX mockups and built responsive Front-End based on client specification - Consumed and integrated RESTful APIs to deliver dynamic, data-driven user interfaces. - Worked with Designers, Backend, and QA teams to continuously refine product features.	
PT. CIGS Indonesia Digital Full-Stack Developer - Intern Cimahi, Indonesia	July 2021 – October 2021
- Developed a Full Stack e-voting app from scratch using Laravel - Tested and debugged the application to ensure security and stability before election day. - Handled version control using Git/GitHub to maintain a clean code repository. - Successfully deployed the application, onboarding hundreds of active student and teacher voters.
